Cypher Systems

## Digital Evidence Enrolment Solution

- Audio files and submitted data files are permanently secured proving that all audio and data files are in their original unedited state
- The unique combination of voice and submitted data file certification enables full audit ability. This is especially useful where one of the parties is illiterate or speaks a foreign language.
- All enrolment is done securely even when the enrolment PC is off-line

### Recommended Applications

- Demographic enrolment, including all relevant data such as fingerprints, photographs and scanned documents
- Police evidence enrolments
- Court evidence and proceedings
- Company governance, such as board meetings and disciplinary hearings

### Key Features

- 'One Time' 1024-bit RSA digital signature secures all files
- Real-Time and Date stored with each file
- High quality signal recording ensures ease of voice identification and analysis
- Tough aluminium housing ensures durability, reliability and long service life
